toilets

FenceLine

RENTALS LTD.

Alberta winters can be extremely challenging on industrial and commercial construction sites. Having warm, clean, and comfortable portable toilets for your employees is a must!

INSULATED TOILETS

- These units are simple and economical way to have heated units at your site.
- Tough, insulated (r4) cover fits snugly over your existing FenceLine portable toilet.
- Units maintain a comfortable temperature in the coldest weather
- Clear side and roof panels let natural light in to the unit
- Units include a small force air heater and small trouble light
- 120 volt power required from site

Lower your labour costs by encouraging crews to stay at site and use on-site facilities as opposed to making regular trips to the gas station. Increased morale at site having top notch facilities
