PORTABLE HANDWASH

PORTABLE HAND WASHING STATIONS AND HYGIENE SOLUTIONS

FENCELINE IS YOUR LOCAL SOURCE FOR PORTABLE HAND WASH STATIONS AND MOBILE HYGIENE

As the manufacturer and distributor of SCRUBSTATION portable hand wash stations, FenceLine provides convenient and mobile options to encourage hand hygiene outside the restroom. From our range of self-contained single basin and double basin hand washing stations to our bulk-fill soaps and sanitizers, our products are specifically created to help keep work areas clean and safe. Whether for your construction facility or outdoor event, our UV-proof, high-density polyethylene (HDPE) hand wash stations are durable and flexible for the most demanding of environments.

WHY PORTABLE HAND WASH?

IT'S A CLEAN, SAFE AND AFFORDABLE WAY TO MOBILIZE YOUR ON-SITE HYGIENE EFFORTS

Hand hygiene is more important now than ever. Unfortunately, permanent plumbing solutions are not always feasible or affordable. SCRUBSTATION portable hand wash stations are a cost-effective solution to promoting healthy hand washing habits no matter where you are. Our portable hand washing stations contain fresh water tanks and are light enough to be easily moved to any location.

The self-contained units have several options including unique heights, widths, basin depths and tank sizes. All units have a hygienic, hands-free foot pump and most units have waste water tanks built into the cabinet. No running water is required. SCRUBSTATION hand wash stations are perfect for construction sites, concerts, festivals, outdoor events, weddings, parks, farmers markets and schools.

HEAVY-DUTY HDPE CONSTRUCTION

HDPE IS A REMARKABLY LIGHTWEIGHT, EXTREMELY DURABLE AND RECYCLABLE PLASTIC

High-Density Polyethylene (HDPE), is an extremely lightweight and durable plastic. It is resistant to rotting, insects, mildew and mold. It can withstand harmful UV rays and both extreme hot and cold weather conditions. Due to HDPE's high impact, chemical and weather resistance, it often outlasts traditional materials. HDPE is also a recyclable material making it a sustainable and smart product choice.

CUSTOMIZABLE ADD-ONS AND ACCESSORIES

KEEP YOUR FACILITIES CLEAN AND SAFE

Customize your SCRUBSTATION and keep it running at its best. From paper towel and hand soap dispensers to extra grey water tanks or replacement foot pumps, we have everything you need to maintain your mobile hand wash stations and keep your facilities clean and safe.

FOUR UNIQUE MODELS TO CHOOSE FROM

CUSTOMIZE THE HAND HYGIENE EXPERIENCE

FenceLine has four unique models of SCRUBSTATION portable hand wash stations to choose from.

All four models are made of UV-resistant HDPE, include hygienic, hands-free, freshwater foot pumps, and have multiple styling options to suit your budget and application. SCRUBSTATION portable hand wash stations are perfect for use in any high-traffic area where hand hygiene is essential.

SINGLE

CORNER SINGLE

SUPER SINGLE

DOUBLE

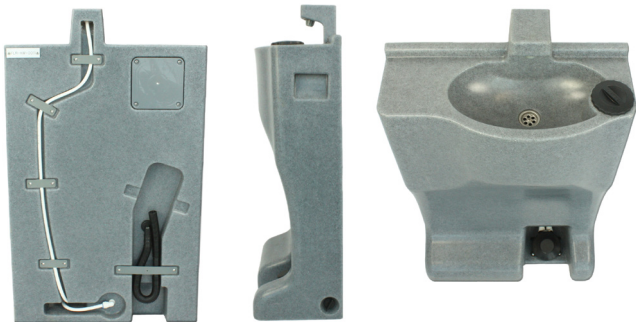

SINGLE HAND WASH STATION

The SCRUBSTATION Single Hand Wash Station fits into almost any space. At only 10kg, this lightweight and extremely durable station includes contoured handle grooves on each side for easy portability. The streamlined design includes a 60L fresh water tank with foot pump, easy-to-access water tank refill location, and waste water drain. All key components remain easily accessible yet hidden from view.
